

AURA System Entity Relationship Diagram

Notation

- PK = Primary Key; FK = Foreign Key.
- 1 and N indicate one-to-one or one-to-many relationship cardinalities.
- The ERD groups entities into Student Support and Questionnaire, Access and Security, Upload and Validation, Academic Core, and Prediction, Alert and Intervention.
- This diagram preserves the same logical entities and relationships as the original ERD, but redraws them in a clearer table-style format for report readability.
